Hi Andrew

Attached is a picture of our water pump that burned at 7AM (Sunday) on August 24/08. The fire department is not sure how much water they used but they were about 4 feet from the pump with a spray. No water was seen flowing into the reservoir, although some may have drained through the ground. We are cleaning the site tonight, and go down at least three feet.

I have also arranged for water samples, which will leave tomorrow on First Air. Let me know of any suggestions you have.
