K	ADDITIONAL INFORMATION, COMMENTS, ACTIONS PROPOSED OR TAKEN TO CONTAIN, RECOVER OR DISPOSE OF SPILLED PRODUCT AND CONTAMINATED MATERIALS The heating system at the City's Apex Garage has been malfunctioning for the last 3-4 days. During this time, a temporary fuel supply has been installed indoors to allow the system to function. On December 27, 2010 at 8:30 am, the Acting Utilidor Foreman was at the garage to let in a contractor to fix the heating system. At this time, it was noticed that a fuel spill of approximately 100 L had occurred on the exterior fuel tank. It appears that a check valve on a secondary motor failed and that the fuel from the temporary supply was pumped in to the main exterior tank. Furthermore, it appears that the containment section on the main tank was compromised resulting in the spill. The extent of the spill is minimal and the fuel has collected under the tank and up to 2 meters from the tank in the surrounding area. The presence of snow and cold weather has helped in keeping the affected area to a minimum. Barricades have been placed around the fuel tank. The City requests that direction be given on the recovery process.
