Sean,

Please accept this email as formal notification that the **City of Iqaluit's "Type A Water Licence Renewal and Amendment" project proposal** is not to include the City of Iqaluit The Development of a Supplementary Water Supply Plan and Preliminary Design project as the City does not have any approved plans for design and construction at this time. The City will prepare a formal application with design and implementation details for these activities in a future application for regulatory consideration and approval.

I trust this email is satisfactory as official notice.

Thank you

Richard
