## RE: Request for Deadline Extension for Requested Additional Information

Dear Ms. Dhillon,

The City has been working diligently to prepare all outstanding documents by the August 30, 2013 deadline. Table 1 summarizes all the outstanding documents that are being prepared for the Nunavut Water Board. We would like to advise you that, currently all items except the Solid Waste Project documents are on track for being complete by the August 30, 2013 deadline.

**Table 1.** Outstanding documents required to achieve Water License compliance

Outstanding Documents	Water License Reference
2007, 2008 Annual Reports	Part B, Item 1
Water Balance Report with Assessment of Recharge Needs	Part B, Item 3
QA/QC Plan	Part I, Item 7
Monthly General Monitoring Reports from 2012 Monitoring Program	Part I, Item 11
Iqaluit Waste Project:  a) Solid Waste Management Plan	a) Part E, Item10
<ul><li>b) Updated Operation and Maintenance Manual for the West 40 Landfill</li><li>c) Abandonment and Restoration Plan for the West 40 Landfill</li></ul>	b) Part E, Item 12, Part E, Item 15 c) Part J, Item 1

Although the three Iqaluit Waste Project items will not be ready for submission for the August 30th deadline, considerable progress has been made on each of these items. The first edit of the draft Abandonment and Restoration Plan and second edit of the draft Operation and Maintenance Manual have been completed. The Solid Waste Management Plan is also nearing completion. The final project Newsletter (attached to this letter) containing the proposed Solid Waste Management Plan was distributed to residents in June. In July, the final Open House was held followed by a consultation with the City's Engineering Committee of the Whole, which is made up of all members of Council.

In order to follow up with the issues brought forward from the July consultations and the editing process, the City requires more time to complete three outstanding Solid Waste Project items.

The City is working toward submitting all three Solid Waste Project items to the Nunavut Water Board on or before November 30, 2013. As a result, the City is requesting that the NIRB deadline for submitting the Hazardous Waste Management Plan (will be included in the new Solid Waste Management Plan), Abandonment and Restoration Plan and NIRB Part 2 Form be moved to November 30, 2013.

Sincerely,

John Hussey

Chief Administrative Officer

City of Iqaluit
