OFFICE DES EAUX DU NUNAVUT

1. West 40 Landfill

Comment: Discrepancies have been identified between what is presented in the City’s Operation and Maintenance Manual for the West 40 Landfill, and what has been observed by the CIRNA Field Operations Inspector.

Recommendation: The Board recommends that City clearly identify and provide evidence of current and actual conditions of the West 40 Landfill Facility, and fully address CIRNA’s comments.

Recommendation: The Board recommends that City provide all documentation associated with any modifications to the West 40 Landfill, in accordance with PART G, Item 1, of the Licence.

2. Deposit of Waste at the End of Federal road:

Comment: The waste deposited at the end of Federal Road has been identified as a concern requiring action by the City. Although the City has indicated that this waste deposited is “not the City’s responsibility,” it will need to be managed.

Recommendation: The Board recommends that City continue to resolve this issue with CIRNA, and confirm who is responsible for this deposit of waste. Once it is determined who is responsible for this waste deposit, the Board will then like to see that a plan is in place to manage it appropriately.

3. Surface Water Management Plan:

Comment: Although the Licence does not specify the development of a Surface Water Management Plan, the Board is in support of this endeavor as it will greatly improve surface runoff and erosion management practices within the City limits.

Recommendation: The Board recommends that City provide it with a timeline for the development of this plan, and once completed submit it to the NWB for review.

Note that the Board appreciates the City’s continued efforts to address comments regarding the 2018 Annual Report, and more generally their active engagement during ongoing activities. The Board request that the City provide a response to these comments by October 16, 2019.
