The city of Iqaluit is looking to start decanting the sewage Lagoon starting on June 7<sup>th</sup> 2021 and continuing till June 17<sup>th</sup>, 2021. As the spring melt and the large amounts of snow in this area has the sewage lagoon above the usual level and would like to have it lowered as the is still some melting occurring. I will forward the tests as soon as I receive them from the Lab. As usual we will be doing our tests as per required.

Thanks,
