Hello Ms. Kubeisinova,

My name is Sumon and I work with the City of Iqaluit as Director of Engineering and Capital Planning. We are starting a project that involves the cleaning of wet well in Lift Station 1, one of City's municipal sewerage infrastructure. This project was supposed to happen last year in October but due to site conditions had to be postponed.

I am writing to let you know that the effluent from the wet well is being planned to be transferred to the lagoon. The effluent will have the characteristics of regular municipal sewage. The total anticipated volume that is expected to be pumped to the lagoon is about 50,000 litres (maximum).

I will give you a call tomorrow to discuss this further and try to answer any questions that you may have.

Thank you.

Sumon
