To clarify, the permitted raw water withdrawal rate from the river is 350 m3/day. This is the permitted maximum rate withdrawn at the intake at the river.

To amend the licence to increase withdrawal rates, the City will need to go through the same process as with the emergency amendment issued on October 15.

Merci pour votre collaboration.

For today's site meeting:

1. Site selection
2. Release of concentrate
3. Traffic control/site security
4. Mobilization schedule
5. Truck filling method and distribution of treated potable water
6. Chemical disposal (data sheet received) under review with intent to direct pump into lagoon
7. Chemical disposal transportation – requesting GN provide these resources
8. Communications

Notes:

City requires 24 hours to disinfect trucks and tanks to accept new water. We plan to start the process on Monday

Water license permits a total withdrawal limit of 350,000L per day from Sylvia Grinnell River. It is expected that we can work within this limit if the concentrate is not included in these numbers. If not, we work to amend the license.

Thank you,

Amy

Subject: Water License and Meeting

Hello CAO,

Thanks for the letter covering us to operate under the current water agreement at the river.

For our records can we get a copy of the water license (Licence No: 3AM-IQA1626) and the amendment please?

See you at 1400 at the River.

Scott
