**Attention: Erik Skiby, Assistant Technical Advisor**

**Re: Hamlet of Pangnirtung: Water Licence # 3BM- PAN 0801 Renewal Application:  
Response to the letter of Mr. Erik Skiby, Assistant Technical Advisor.**

Dear Ms. Beaulieu,

In response to the letter of Mr. Erik Skiby, Assistant Technical Advisor, dated April 24, 2014, I am responding as follows with necessary clarification:

**1. Plan for Compliance:** Under this licence, Community has three Environmental Facilities:

Water Truck fills station, Wastewater treatment Plant and Waste management site (land fill):

A. Wastewater Treatment Plant: Completion of Construction is expected by December 31, 2014

B. Water Truck fill station/Water Reservoir: Construction is expected of the new truck fill station in December 31, 2016.

land fill site any more. They are exporting the remains of the processed fish to the overseas market.

3. **Water truck Fill Station (WTFS):** This plant was built in NWT regime. Without O&M, how the previous licenses were renewed and why it is being asked today. However, we do not have any electronic copy in the system. Please find attach a PDF file copied from the hard copy.

The new plant is expected to be ready for commission in 2016.

#### 4. Solid waste Disposal Facility:

This Capital project is on hold. The existing facility is not engineered and no O&M manual was prepared at the past. Since the new facility is delayed, we are working on the operating procedure for the existing facility and expected to be available by December 31, 2014.

## 5. Abandonment and Restoration:

- A. Old Sewage Lagoon: Please see attached the decommissioning plan.
- B. Old WTFS: The A&R Plan will be available 6 (six) months prior to commissioning of the new WTFS
- C. The A&R Plan for old landfill site will also be available six (6) months prior to commissioning of the new facility.
