December 21, 2017

Sub: 3AM-PAN--- (3BM-PAN 1417 renewal) Type “ A” Municipal Water Licence – Amendment Application, Hamlet of Pangnirtung.

Dear Karen,

We made a list of Commitments attached resulting from the TM/PHC dated Dec. 05 and 06, 2017.

Please find a USB containing all the documents except item 4 and 6. All the documents were e-mailed to you except item 3, 4 and 6. Item 3 is too big.

The intervenors have decided to submit item 4 within 4 yrs. from the date of the licence renewal.

Item 6 cannot be submitted now because we could not find the topo information requested by NWB within this short time period, where direction of flow (gradient, i.e., 1m contour lines) etc. is shown. We have searched our GN systems and also previous works done during the NWT regime. We will continue searching with the department of Natural Resources Canada to determine if they have anything of this nature. Alternatively conduct a contour survey which might not be possible during this winter season and might take two or three summer seasons to complete.

Also it is difficult to prepare a drainage Map showing the direction of flow in item 7 at this time. Not sufficient resources are available in this season to present the exact field information. The data obtained for item 6 will suffice for the development of a Map showing the existing drainage flow path of the area of the wastes management facilities.

Please keep me in the loop for the entire approval process. I will appreciate if you contact me if you have any concerns or questions on this file.

Bhabesh Roy, M.A.Sc., P.Eng.
