

NUNAVUT WATER BOARD
Date: <u>March 21, 2018</u>
Exhibit No.: <u>8</u>

EXECUTIVE SUMMARY

Indigenous and Northern Affairs Canada (INAC) has participated in the ongoing review of the Government of Nunavut – Community and Government Services' (GN-CGS) application to renew and amend its Nunavut Water Board water licence 3AM-PAN— for municipal undertakings at the Hamlet of Pangnirtung. This project is situated in Pangnirtung in Nunavut's Qikiqtani region.

During the technical review, issues covered four major topics:

- Water supply
- Wastewater treatment
- Waste management
- General comments

Most of the issues have been resolved through discussion with GN-CGS. Those that remain relate the water management at the waste management facilities.

Based on the information available, it is recommended that the renewal application be accepted with due consideration given to INAC's comments.
