I think 550 times 365=200,750 cubic meters is the correct figure.

Bleeding process will be continued because we are not planning for any lift stations. Therefore we will always consider bleeding. But Utilidor buried water and sewer lines have been upgraded. No pipe is leaking right now. The extraction volume should be much less as recorded in 2019.

I have also a doubt about the meter. Also I do not have any technology to cross check.

For time being, Consider as I have mentioned above.

I am searching for a technology to cross check.

Thanks Sergey.

Bhabesh

No worries Bhabesh.

Maybe you can use Pangnirtung Plans as a template. I have attached them just in case.

Regards,

Hi Sergey

The documents requested are available in 2012 renewal and 2017 Amendment application.

2012 renewal:

140321: Spill

140825: Char lake hydrology study by exp

QA/QC should be there as well.

2017 amendment:

171124 FC limitation at the sewer out fall by exp

WWTP related documents are available at the end of March. Any section is available before hand will be sent to you.

Thanks.

Bhabesh

Richard

I need the following documents

1. Spill contingency Plan
2. QA/QC Plan
3. Hydrology study
4. Exp's report on Sewage out fall

These were submitted during the last renewal and amendment.

I will appreciate if you kindly send them to me. My computer lost all of them.

Thanks.
