Good afternoon Richard,

The primary concern that the Department of Fisheries and Oceans Canada (DFO) has regarding this project is the size of infill associated with the proposed pump house. Specifically, the large footprint of the gravel infill occurring below the High Water Mark, and its potential effect on fish and fish habitat.

I hope this satisfies the need for DFO comments. If you require any additional information, let me know. Moving forward, DFO will contact the applicant and keep NWB informed throughout the process.

Thank you.

**Madeline Becker**
