---

Good Afternoon Bhabesh,

I have a few questions for you on the 3BM-RUT---- Utilidor application.

1. Has any work been conducted on the Water and Wastewater infrastructure in the last two years?
2. Does the GN-CGS plan on including the truck delivery water and wastewater systems proximal to the airport as part of the 3BM-RUT---- Licence (airport not included as it is currently licensed under 3BM-YRB0308)?
3. If so, what is the final discharge point for the sewage trucks?
4. Does the GN-CGS intend on any sewage treatment upgrades within the next 5 years?

Thanks and I may have more questions for you on this file in the future, I am just trying to get the process moving again.

---
