Nunavut Water Board,

Please accept this application for cancelling Water Licence #3BC-AET1313 that expired August 31st, 2013. The small research group operating under principle investigator Steven Siciliano at Alexandra Fiord, Nunavut did not exceed any water usage limits set forth in the water licence, limited any research impacts on the environment during their stay using best practices outlined by the Polar Continental Shelf Project and ensured the camp and field sites were properly abandoned at the end of the field season.

The Nunavut Water Board acknowledged the receipt of the required annual report on March 18, 2015. Herein is the cover letter and cancellation application form requested by the Licence Administrator, Ida Porter submitted by email this January 15, 2016.

Payment of the \$30.00 cancellation fee should be received shortly, the request has been submitted to the financial service division at the University of Saskatchewan and they require approximately 15 days to issue the cheque.

Submitted on behalf of Steven Siciliano by

Amanda Guy, PhD Candidate
Department of Soil Science, University of Saskatchewan
