**General Background Information on the Project (\*optional):**

Our project aims to document knowledge of arctic plants and understand how climate change affects them. The research builds on our previous extensive studies on the arctic flora, including our 2007 publication "Flora of the Canadian Arctic Archipelago." During each season, we visit approximately 3 different sites. Each year we visit a different location, generally not revisiting the same sites during a 5 year period. Therefore, each site is different, and may or may not have been visited in the past.

We did not do field work relating to this permit in 2009, so we have no items to report.
