Good Afternoon,

The coordinates provided on the application were taken from NTS map sheet no. 120E05 scale 1:50 000 which I do not have readily available at this time. We have however, taken decimal degrees coordinates from our internal Realty Asset Information System. Note that they are slightly different (within feet) of the coordinates on the original submission. We have converted them to DMS.

The coordinates are:

82 degrees 30' 0.875 " N Lat
62 degrees 20' 37.399" W Long

If this discrepancy poses a concern, please let me know and I will go back to our consultant (FSC) who currently has the NTS map.

Thanks
Lori

Good afternoon Col. Baker – I note from your water licence application that the location of the site is indicated in degrees and minutes only. Would you please provide our office with the full co-ordinates to include seconds as well. Thank you.
