

## **Appendix G**

### **List of Waste Disposal Activities**

**Year:** 2012

**Reference:** 3BC-ALT1015, Part B, 1a.

#### **Main Station Landfill:**

-Deposition of non-hazardous incinerator ash and all acceptable materials to site.

#### **Millionaire's Dump:**

-Deposition of non-hazardous metallic and bulky waste materials.

#### **Battery Dump:**

-No wastes were deposited at this site; no waste deposition is allowed at this site.

#### **Dump #3:**

-No wastes were deposited at this site; no waste deposition is allowed at this site.

#### **Landfarm:**

-No wastes were deposited at this site; existing material was rotated to facilitate aeration.

### **Hazardous Waste Backhauled from CFS Alert in 2012:**

As listed in Movement Document 2464625-9:

- 86.2 kg of waste material with Beryllium Oxide compound to 8 Wing Trenton;
- 11.6 kg of Polychlorinated Biphenyl (lighting ballasts) to 8 Wing Trenton;
- 152 kg of Asbestos (white tiles) to 8 Wing Trenton.

CFS Alert Hazardous Waste Generator #NUG100048; DND Hazardous Waste Carrier#NUC200012. Due to legibility of Copy 6 (2464625-9), a photo of Copy 2 is attached.

All hazardous wastes from CFS Alert were collected at 8 Wing Trenton and transferred to contractors for proper disposal under 8 Wing Trenton's Ontario Hazardous Waste Generator #ON0046507.

For the Polychlorinated Biphenyl (lighting ballasts) wastes, copies of the Movement Document Copy 1 & 6 (JP13035-3) with Bill of Lading are attached to demonstrate that these items were sent to an appropriate external disposal contractor (Aevitas Inc., Ayr, Ontario; Ontario Hazardous Waste Carrier #A57537.)

### **Other Non-Hazardous Waste Backhauled from CFS Alert in 2012:**

- 88.9 kg of Waste non-spill wet batteries to 8 Wing Trenton for disposal.
