Subject: Department of National Defence – Advanced Winter Warfare Project

Dear Mr. Roy:

The Nunavut Water Board (NWB) acknowledges receipt of your letter dated November 9, 2009 requesting confirmation on whether or not the inclusion of 4 new camp locations will require an amended water licence. Please be advised that our office did not receive any enclosures or CD with your letter.

The inclusion of 4 new camps will require an amendment application as the current licence is specific to 4 camp locations. To facilitate this request you will be required to submit the following:

- Water Licence Application Form (duly signed)
- Area map of locations for the new campsites
- Remote camp questionnaire (which will identify methods for disposal of waste)
- Project summary in English and Inuktitut

Our technical advisor has asked if you could provide a general range of lats and longs (maximum, minimum) for the area where the camps will be located. This could eliminate the need to amend the licence if camps are continually moving to different locations. Please provide application documents electronically to licensing@nunavutwaterboard.org.

Sincerely,

Original signed by:

Phyllis Beaulieu
Manager of Licensing
