Mr. Langlois,

I have taken the liberty here of cc'ing this email to the Nunavut Water Board to ensure they receive a copy of your Annual Report as required. Once they have reviewed it you will be notified of any further information required by the Board in relation to that report.

With respect to the License, will you be applying for an renewal or are you planning to apply for cancellation? Both of these forms are available from the NWB's web site. Please complete the form as necessary and submit it to the board as soon as possible.

If you chose to apply for a renewal please also complete the Assessment form and submit it to my office by March 31st 2015 so that we may properly assess the file.

If you have any further questions please do not hesitate to contact me.

Sincerely,

Andrew Keim

Good morning Mr. Keim, please find attached a report of activities for our field campaign that occurred on Barnes Ice Cap. I hope it is to your convenience.

Do not hesitate to contact me if you have any further questions,

Regards,

Good afternoon Alex,

The required annual reports appear in the first section of your license. In your case I refer you to page 4, Part B (2) under General conditions. This section details what should be included in the annual report.

The standard Annual Reporting Form (excel spread sheet) is available from the Nunavut Water Board on their FTP site. Please note that a Report covering all four years would be fine rather than one for each year (given there was no subsequent activity after the first year).

A request for cancellation form is also available for the Nunavut Water Board and once completed will be entered into the system so that a Final Inspection can be completed and your file closed.

I hope this provides you some clarity. If you have any further questions I urge you to contact the Manager of Licensing at the Nunavut Water Board, Phyllis Beaulieu Manager of Licensing Nunavut Water Board.

Good morning Mr Keim, I am not sure what is needed and why. We were on the ice cap only once, 4 years ago in March 2011 for one week. We did not go afterwards given the absence of support from PCSP. That information was communicated to licensing, and PCSP. And our work was highlighted in PCSP annual report. So we do not need a renewal of the license now as we do not have plans to go back on Barnes for the next couple years...

We were not told annual reports were due to NWB? The one needed by PCSP was provided...

If you could clarify this it would be appreciated...

Thank you!

aLex

Mr. Langlois

The Field Operations Unit of Aboriginal Affairs and Northern Development Canada is currently engaged in conducting our annual Risk Prioritization Exercise in preparation for the 2015 field season.

It has come to our attention that the above noted Water license for work conducted by the University between 2010 and 2013 has expired. Additionally a review of the file is unable to produce either an application for renewal or an application for cancellation of the expired License.

In addition to the enclosed assessment form to be completed and returned to our offices by March 31st 2015, I have included a copy of your Water License. I appreciate your cooperation as we move ahead with this file.

I am specifically interested in what work was conducted during the term of the License as there appear to be no Annual Reports on file for the life of your project.

If you have any questions or concerns please do not hesitate to contact myself or the Manager of Licensing at the Nunavut Water Board, Phyllis Beaulieu Manager of Licensing Nunavut Water Board. Licensing@NWB-OEN.CA

Thank you in advance for your continued cooperation,

Respectfully,

Andrew Keim
