**8. ABANDONMENT MEASURES**

The following measures have been taken to address the final abandonment conditions required by the licence: (explain, with drawings, how abandonment conditions of the licence have been met; how stream channels have been rehabilitated; how tailings have been recontoured; how instream structures have been removed; and how waste materials have been disposed of. Enclose pictures if available.

Upon abandonment after two weeks of occupation by four people living in tents, all pits (latrine, sump) were filled. No other modification had been made, nor were there any unauthorized discharges or fuel spills, nor did our activities result in any erosion or entry of sediment into the Sheridan River or other ephemeral streams. All camping material was removed when the site was abandoned. Disturbance to the ground surface and river banks from tracked vehicles originating from CFS Alert remain the primary agent of ground disturbance in this area.

**9. CERTIFICATE OF COMPLETION:** Application for Licence Cancellation must be accompanied by either of the following:
