April 23, 2015.

Dear Ms. Beaulieu and Mr. Keim:

On behalf of the retired Principal Investigator of the Environment Canada's seabird project, Dr Anthony Gaston, I would like to request cancellation of expired permit 3BC-DIG0812. The Digges Island camp at 62°34'30"N, 77°43'0"W will no longer be used by Dr. Gaston for his research. In addition, no field work was done by Dr. Gaston at Digges Island in 2012, hence no report for that year was submitted. The camp was visited very briefly to clean it up and remove any remaining fuel, ammunition and food.

I have attached the completed AANDC project assessment form.

If you have any questions regarding this material please direct them to me, [Christine.Eberl@ec.gc.ca](mailto:Christine.Eberl@ec.gc.ca) 613-998-8282 and please do not hesitate to contact me with any questions or concerns you may have.

Sincerely,

Christine Eberl
