Subject: Re: Confirmation of Camp Coordinates

Dear Sean,

For now I suggest using the coordinates from the project summary. The variability in the coordinates reflects the fact that we have not established the precise location of our camp.

We will not be able to provide precise coordinates (down to minutes and seconds) until we are on the ground and have established an area to serve as an air strip.

Melissa

Dear Ms. Lafreniere:

Could you please confirm the coordinates of the proposed camp for the Drake Point Project in terms of degrees, minutes and seconds.

The licence application has the following coordinates: **Latitude 76° 24' N and 108° 34' Longitude.**

The project summary has the following coordinates: **Latitude 76° 27' N and 108° 33' Longitude.**

Regards,

Sean Joseph
