NOTIFICATION OF RESEARCH

PLEASE BE ADVISED THAT SCIENCE RESEARCH LICENSE No. 02 095
10N-M HAS BEEN ISSUED TO:

Keith Dewing
Geological Survey of Canada
3303-33rd St NW
Calgary, AB
T2L 2A7 Canada
403 292 7135

TO CONDUCT THE FOLLOWING STUDY:

Geology and hydrocarbon potential of Ellef Ringnes Island

SUMMARY OF RESEARCH:

The purpose of this project is to update our understanding of the geology and hydrocarbon potential of Ellef Ringnes Island. The island was last mapped in 1967. A detailed geological map of the island will be produced. This map will be used to help re-interpret the seismic data that was collected in the 1970s and 1980s. Field work will be from a temporary tent camp of about 20 people for one month, with a few days of setup and teardown at each end. Camp will be taken in to an existing airstrip using a Twin Otter. Transport on the island will be by Bell 205 helicopter supported by the Polar Continental Shelf Project.

THE STUDY WILL BE CONDUCTED AT: Ellef Ringnes Island
BETWEEN: June 01, 2010 - September 30, 2011
