Dear Mr. Kabloona and Board Members,

I had a limited field season in 2011 due to medical reasons and funding constraints. We (4 people) were only at Polar Bear Pass, central Bathurst Island for 1 day to upgrade equipment on an automatic weather station. This occurred at the end of August, 2011. We did not take any drinking water from the Goodsir River. We brought drinking water with us from Resolute Bay. We ferried all garbage back out to Resolute Bay. In 2012, we hope to be in the field for a longer duration (about 6 weeks).

Kindest Regards,

Kathy L. Young  
Professor
