

EBA Engineering Consultants Ltd.

Creating and Delivering Better Solutions

May 3, 2005

EBA File No.: 0701-1740077-002

Nunavut Water Board
P.O. Box 119
Gjoa Haven, NU X0B 1J0

Dear Sir:

Subject: Amendment to Type-B Water License MWB6HLC0406

EBA Engineering Consultants Ltd. (EBA) has been retained by Matrix Aviation Solutions Inc. to obtain an amendment to their existing water licence for a remote camp on Hope Lake Nunavut. Please accept the following application for the amendment. Included are the following:

1. Application for amendment
2. Remote Camp Questionnaire
3. Summary
4. Camp Contingency Plan
5. Three figure of the camp location and general layout

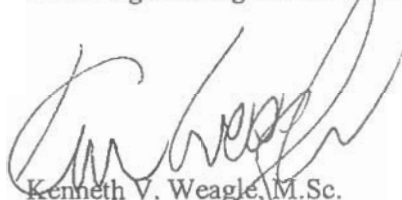

The application and water use fee will be forwarded directly to the board by Matrix Aviation Solutions Inc.

The amendment is required because a site survey in the fall of 2004 showed that the licensed water source, Hope Lake, was contaminated with fibreglass insulation and was not fit for human consumption. The new water source will be an un-named creek near the air strip and the camp location will be moved to the northwest side of the airstrip.

If you require any additional information please contact Mr Ken Weagle at (403)723-6879 or Mr. Martin Knutson at (867) 766-3134.

Respectfully submitted,

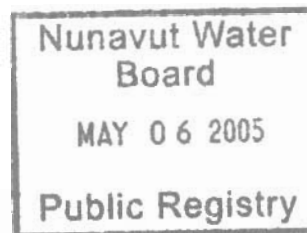

EBA Engineering Consultants Ltd.

Kenneth V. Weagle, M.Sc.
