Hi Eric,

Great. I see no problems proceeding with this.

So..

Step 1. Send this letter to the NWB attention Phyllis Beaulieu. [licensing@nunavutwaterboard.org](mailto:licensing@nunavutwaterboard.org)

You will need to add the following information:

1. Annual reports for the duration of the license. I suggest you fill out one of the Annual report forms I have enclosed below.. If you did one form that encompassed all the years of the license you should be good.
2. You may also be required to pay the water usage fees. ( You are paying for the access to water not the water it's self).. I can not speak to the board's willingness to forgo this fee. You could include in your letter a request to waive the fees and that would be a board decision).
3. As for the Spill Plan, please contact the board to determine what is required for the up-date. (as it was not in use this may not be required)

Once the above has been submitted to the water board;....

Step 2. The NWB will then forward to me asking if AANDC can recommend the closure.

Step 3. I will write back a letter and recommend the file be closed/ canceled

Step 4. Board will close/cancel license at their next meeting and send you an official document saying so.

Sorry for the delay in getting back to you. I was at my Mom's 80th birthday and just got back to the office today.

Hope all is well in Baker lake

Cheers

Andrew

Hello Andrew,

Attached is a letter to cancel our license. Please let me know if you need more info.

Thanks,

Eric

Hi Eric,

have you sent the letter to the NWB stating you wish to cancel your license as yet?.

Please keep me in the loop

Andrew

Hi Andrew,

I've called your number a couple of times and got your answering machine each time. Can you give me a call please. I'll be home from work all day today.

Thanks  
Eric Tapatai

Good morning Eric, attached for your information is a copy of the licence issued in 2007. Please review terms and conditions which identify reports required to be submitted to our office. Also attached is a copy of the inspection report from 2011.

Please note the following outstanding issues:

1. B1 – required to provide water use fees – amount outstanding is currently \$150.00 (\$30.00 per year for 2008 through to 2012
2. B2 – requirement to provide annual reports on or before March 31<sup>st</sup> of each year. If there was no activity on site then documentation of no activity is required (copy of annual report form is provided) Currently outstanding are annual reports for 2007 to 2011.
3. H2 – an addendum to the approved spill plan was to be submitted within a specified period and was not submitted.
4. Expiry of Licence – please note that the expiry date of the current licence is September 30, 2012. If you are planning on renewing your licence you will need to submit an application for renewal immediately. Our normal process time for applications is 3 months. If you are not planning on renewing this licence I would suggest you apply for a cancellation. This will require all terms and conditions be complied with including items identified on the AANDC inspection report. We cannot close a file until such time as all issues have been addressed and accepted by the NWB and AANDC.

If you have any questions please don't hesitate to contact our office.

Regards,

Phyllis Beaulieu

Manager of Licensing

Hi Phyllis,

When was inspection? I actually work for the Hamlet of Baker Lake now and only use the camp for camping purposes. I quite rarely use this email address now too. I wish I was there during inspection. My first week there was last week during Nunavut day long weekend after the winter. We went there on July 7 until the 12. Was supposed to be just the weekend, but we got iced in for a few extra days.

The things listed I'm thinking on here like:

The cabin that isn't on a proper foundation belonged to Paul Kavik who initially was going to work with me when I can't be at the camp when we started in the beginning. He had moved his cabin to that area so he would have his own cabin to work with. He passed away the spring before we started just after moving his cabin. Susan his wife sold the cabin to people who ended up being partiers. They'd be there when we're not there and we ended cleaning out emptied beer cans and other paraphernalia when we go there. I had started boarding up that old cabin, but opening it up in the summer to air it out and melt the snow that would accumulate in there. There have been many many time I have told the new owner Theophile Panika that he needs to move that cabin out of their and I had forbid anyone to use it while on that piece of land. I had actually sent a facebook message not too long ago and told them that if not moved it will either be burnt or moved onto the ice after first freezing this year as it has been a security threat.

The fuel drums that are there were what was attached to the cabin and I have removed them.

That area is a very public place with many other camps surrounding. I do not keep fuel or any type of garbage over there as it is close enough to town to bring stuff back. This is what I was taught by my father growing up.

The tent frame or something mentioned... I don't know what or where that would be because I have never had a tent up at my camp as there is no need for it because I use my cabin.

3 years ago when the lake froze up smoothy and people were driving vehicles to Prince River I had asked the Mayor of Baker Lake for help to start cleaning up Prince River. There had actually been a camp that was just burnt (old inuit belief) when the mother of the family died about 20 years ago. I had started taking loads of bed springs, garbage can, bathtubs and much more back into to for the dump. The Mayor told me to just burn up anything burnable over there instead of hauling them back.

Now there is another camp about 200 yards away from mine where Esa Tarraq the old own just passed this spring, but actually hadn't been at her camp in about 6 years because she required the use of an oxygen tank. She is actually my step aunt. I asked her if she would like us to clean her camp and destroy her molding condemned cabin where mushrooms had even started growing in her cabin. I asked her if she wanted us to bring back what ever may be usable to her home in town. She said "no"... She thought she would be able to start going to her old camp again, thinking she would get well. Just about a month ago I noticed that someone has been around her camp and I asked her son Roland to help clean 30 yrs of garbage and he didn't want anything to do with it. We alway sknew her old cabin was condemned and not useable at all. But out of respect for her we left things and now she's passed this spring.

Was I supposed to do an annual report? I'm sorry I hadn't even realized that.

Hoping to hear back from you  
Eric Tapatai
