Dear NPC personnel,

I am currently preparing for an archaeological field camp this summer near Cambridge Bay. The camp itself is intended to be very low impact. The project involves camping at two sites, each occupied for approximately two weeks, with 6 to 7 people in camp. Therefore, each camp will see approximately 98 person days of occupation. Please see attached Water Board application for more details.

I have applied for, or will apply for, a Nunavut Archaeology Permit, Inuit Land Use License, and Nunavut Water Board License, for these activities. The research is planned and carried out in cooperation with the Kitikmeot Heritage Society (KHS), an organization run by Inuit elders dedicated to researching, preserving, and interpreting heritage issues.. I was in Cambridge Bay in December to plan these activities, and the KHS is very supportive of the proposed research.

I am emailing you in order to ensure that this research meets NPC conformity.

Thanks very much,

Max Friesen
