Hi Sean,

I estimated 2 -3 gallons of water use based on cooking and washing some dishes. We have always used bio degradable camp soap for cleaning our dishes and the gray water is just spilled on the ground. There would also be a minimum use for brushing teeth and washing. We also always identify a location close to camp that is used as a common toilet and all human waste and toilet paper is covered with flat rocks to contain it.

Let me know if you need any further information or changes to this plan.

Thanks

Tom

Good morning Tom:

Your application stated that your camp will produce 2-3 gallons of grey water. Could you please provide details with respect to disposal for the aforementioned item as well as information on disposal of camp sewerage.

Regards,

Sean B. Joseph
