Re: Spill Response Plan and Abandonment & Restoration Plan 3BC-MAR1014

Dear Mr. Palaia:

The Nunavut Water Board ("NWB") acknowledges receipt on November 22, 2010 of your spill response plan and abandonment and restoration plan for the Mars Society Project, water licence number 3BC-MAR1014.

A preliminary technical review of your submissions was conducted and, they did not contain sufficient information for the NWB to commence processing the reports at this time.

The Spill Response Plan shall include the following information:

- The name, job title and 24 hour contact number for the person or persons responsible for activating the spill plan;
- A description of the type and amount of contaminants stored on site;
- A description of the spill prevention measures to be undertaken in the handling, storage and disposal of petroleum products and hazardous materials;
- Steps taken to report, contain, clean up and dispose of a spill;
- A site map of sufficiently large scale to show the location of buildings, contaminants storage areas, sensitive areas such as water bodies, probable pathways of contaminant flow and general topography;
- A description of the spill response training provided to employees who will respond to a spill;
- An inventory and location of the response and clean up equipment (spill kits) available to the spill clean-up team;
- The means by which the spill plan is activated; and
- The date that the spill plan was prepared.

The Abandonment and Restoration Plan shall include the following information:

- Table of Contents;
- Description of Camp and Exploration Operations including the campsite; fuel storage; campsite sewage disposal; solid waste; waste oil; hazardous waste (if any); drill holes,

- cores and sumps (if any); bulky items; water intake; helicopter landing pad (if any); generator (if any);
- Description of Final Abandonment and Restoration including the proposed time frame and restoration of camp; fuel storage and re-fuelling areas; grey-water sump; solid wastes; waste oil; hazardous waste; drill sites, sumps and cuttings; bulky items; water intake; helicopter landing pad; generator.

We will resume the processing of your reports once revisions have been received.

Please call the technical advisor at (867) 360-6338 extension 30 or email at k.kharatyan@nunavutwaterboard.org if you have any questions.

Sincerely,
