Subject: RE: 3BC-MBP1010 Renewal

Hi Sean,

The renewal application that was received Feb. 3 added two additional sites to the project. Because the sites received a positive conformity determination from NPC, impacted the same communities that were previously notified, and the project activities were the same, the NIRB issued a formal decision that the project was exempt from further screening as noted in the letter:

“After completing a review of the information provided in support of the current application, the NIRB is of the understanding that the proposed amendment and renewal does not change the general scope of the original project activities, and the exceptions noted in NLCA 12.4.3 (a) and (b) do not apply. Therefore, this application is exempt from screening as per Section 12.4.3 of the NLCA and the activities therein remain subject to the terms and conditions recommended in the original March 31, 2009 Screening Decision Report.”

This determines that the amendment and renewal activities still fall within the original scope of the project that was screened by the NIRB. Because the project activities have already been screened by the NIRB, the NIRB does not screen project activities that have already been screened, therefore the project can proceed under the Screening Decision issued on March 31, 2009. As this is an official determination under section 12.4.3 of the NLCA, which is sent to the Minister responsible for the authorizing agency, it is as much an official decision as the original screening decision.

Best regards,

Tara Arko

Hi Tara,

Under the renewal application, the proponent has provided the coordinates for two new locations within the same region (Qikiqtani Region) on which activities associated with the project will be conducted during the 2011 field season.

The screening exemption report from NIRB dated February 8, 2011 seems to have taken those new locations into consideration. Could you please confirmed whether or not the report dated February 8, 2011 should be treated as NIRB's decision pertaining to the renewal application for Licence MBP1010.

Regards,

Sean

Subject: RE: 3BC-MBP1010 Renewal

Hello Sean,

To confirm from our phone conversation yesterday, the new application that the NIRB is screening under the file number 11YN011 for Elizabeth Turner is a completely new project located in the Kitikmeot region separate her original project screened under file number 09YN014 located in the Baffin region.

If the water license is for the old project in the Baffin region (see project activities in attached screening decision), it would still be covered under the 09YN014 screening decision.

If the license is being issued for activities in the Kitikmeot region, and include the project components outlined in the NRI application (attached), then the 11YN011 screening decision which has yet to be completed would be applicable.

I will be out of the office for the rest of the week, so please let me know today if you have any further questions or concerns on this project. Thanks!

Tara Arko

Hello Tara:

As a follow-up to our conversation this morning, could you please confirm whether or not further screening is required for the Mesoproterozoic Sedimentary Basin Project by Elizabeth Turner of Laurentian University.

The project is located in the Qikiqtani Region of Nunavut. NIRB issued a screening decision report (File No. 09YN014) for the project on March 31, 2009, and a screening exemption report on February 8, 2011.

Regards,

Sean

Hi Phyllis,
I'm not sure you meant to send this to me...maybe Elizabeth Turner?

Hi Ida, sorry for the delay in responding – still working with the new staff in their workload expectations. We are still reviewing Elizabeth Turner's latest application and are unable to start screening it until she supplies the Innuinuktun translation. She is working on supplying that as soon as possible. I will make a note to notify you when there are further developments to the file.

Cheers!
