Dear Ms. Ikkutisluk:

Subject: Proposed works or undertakings are not in or near fish habitat.

Fisheries and Oceans Canada (DFO) received your proposal on September 17, 2004, concerning the application for a Type "B" water license. To expedite future correspondence or inquiries, please refer to your referral title and file numbers when you contact us.

Referral File No.:	04-HCAA-CA7-000-000143
Habitat File No.:	NU-04-0143
Referral Title:	Exploration and Camp, Mianiqsijit society, Kivalliq Region

It is our understanding that your proposal consists of:

- *Water usage will be restricted to human consumption and will not exceed 100 litres/person/day.*
- *Water intake will be equipped with a mesh screen to prevent entrapment of fish.*

as outlined in the following plans:

- *NWB Water Licence Application Form.*
- *Exploration/Remote Camp Supplementary Questionnaire. Nunavut Water Board.*

If the above plans have changed at all, the advice in this letter may no longer apply and you should consult with us to determine if further review is needed.

We have found that the proposed works will not likely effect fish or fish habitat. No further review pursuant to the habitat protection provisions of the *Fisheries Act* is needed.

Please note that this letter of advice does not release you from the responsibility to obtain any other federal (for example, the *Navigable Waters Protection Act*), territorial or municipal approvals. If you have any questions concerning the above, or if my understanding of the proposal is either incorrect, incomplete, or if there are changes, please contact me directly by telephone at (867) 979-8016, or by fax at (867) 979-8039.

Yours sincerely,
