Good morning Derek,

RE: NWB 3BC-NEI1215 Mueller

A review by NPC of a proposed renewal/amendment to a project is generally triggered when an application or request is received from a land use authorising agency. Upon receipt, the NPC will review and determine whether a conformity determination is required.

To date, the NPC has not received the renewal/amendment application described below from any authorising agency. I have copied the Nunavut Water Board for their information.

Please contact me should you have any questions.

Sincerely,

Brian Aglukark, NPC

Dear Brian,

Would it be possible for you to let us know whether we must reapply for conformity to renew our water board licence? And if not, whether we need a new NIRB screening? Please see below for my original email.

Thanks.
Derek

Dear Brian,

I am looking to renew a water board licence (3BC-NEI1215 under the name of Luke Copland) under the same conditions as declared in the original application. To do so, I need to ensure that we have conformity. Given that we are not planning on any different activities, would you please let me know if we must apply to determine conformity or not.

I am attaching the original questionnaire to this email. All these answers hold true at the present time. The NPC decision is also attached. It specified that NIRB screening was not required. Is this also the case now?

Thank you,
Derek
