Hi Helen - yes, thanks very much for the clarification. Oftentimes we need quite a bit of information in order to sort through what exactly is being proposed for any given project!

If the current application is for a renewal to the water license for the project only (i.e. no other authorizations or permits are being sought out or amended/renewed), the NIRB will not be screening the project. This is in keeping with Item 5 of Schedule 12-1 of the Nunavut Land Claims Agreement which states that "water uses not requiring a public hearing pursuant to Schedule 13.7.3" constitute project proposals which are exempt from screening by the NIRB.

If you have any further questions, please contact our office.

Best regards,

Amanda Hanson

Dear Amanda,
The Scientific Research License is 3 year license (June 2009- August 2011) Please find attached a scanned pdf copy of this years copy of the license.
Hope that this helps.
Many thanks,
Helen
