

Addendum #1 to Water License Application

8. Waste

Sewage – 9.6 m³/day - collected in sewage tank and hauled to community sewage lagoon for disposal.

Solid Waste – Incinerate on-site in approved incinerator.

Hazardous Waste – batteries, aerosol cans – collected, stored in drums, removed from site at completion of project.

Bulky Items/Scrap Metal – collected, stored and removed from site at completion of the project.

Waste Oil – collected, stored in cubes and removed from site for recycling at the completion of the project.

Gray Water – collected with sewage and disposed of with sewage.

- 10.** NIRB screening for the road has been completed. NIRB sent letter to the Minister of INAC indicating that the project should proceed. We are awaiting approval from Minister of INAC at this time.
