**Re: Film Crew Expedition to film television documentary**

Windfall Films seeks collaboration to film a television documentary to air on PBS in the US on Devon Island in July 2012. We are sending this communication to tell you more about who we are and what we want to do in Devon Island in July 2012.

Windfall Films are a television production company based in the UK. Windfall have earned an international reputation as a producer of award-winning science programmes. Please visit our website for a list of credits and awards at [www.windfallfilms.com](http://www.windfallfilms.com) Windfall are working in collaboration with the Howard Hughes Medical Institute to film this television documentary to air as a special on PBS.

We understand that the land and wildlife of Devon Island are very sensitive. We are working with Neil Shubin, a Professor at The University of Chicago who has performed previous scientific studies on Ellesmere Island in 1999-2008. Our small team of six (6) will film Neil Shubin discussing his fundings from previous expeditions on camera. Neil has treated the land with great respect over the years and we will follow in Neil's footsteps to continue to work with the Hamlet to minimize any impacts to the land or the wildlife in your region.

I look forward to talking with you more about us, our project and the ways that we can work with the Resolute Bay community and Hunter Trapper Association.

Best Regards,

Kristina Obradovic  
Head of Production

Nunavut Water
