

March 17, 2014

Dear Ms. Phyllis,

During the life time of the expired water licence, a new single cell sewage Lagoon was built and the old one was decommissioned under the amendment no.1 dated April 16, 2009. No modification was made to Water supply system and waste management site. The new lagoon has been operating for 2012 following the guidelines established in the Operation and Maintenance Manual prepared by the Consultant exp Services Inc. (ex name was Trow associates Ltd).

Please consider the present application in the new format and attached supporting documents as follows to renew the Water Licence # 3BM-ARC 0810.

- **Spill Contingency**

 (867) 899-7301  (867) 899-7330

Nunalingni Kavamatkunillu Pivikhaqautikkut  
Department of Community Government Services  
Ministère des Services communautaires et gouvernementaux

- Thermistors Monitoring
- Sampling sheet and
- As-built drawings

Appendix- D: Design for Abandonment and Restoration of old lagoon

Appendix- E: Geothermal report of the old Lagoon

Appendix- F: Annual reports 2011, 2012 and 2013 with Lab results

Appendix -G: Technical summary of the Environmental Facilities in English and Inuktitut

Appendix--H: Hamlet authorization letter

It is noted that the Monitoring points for the old sewage lagoon and its wetland do not exist anymore. The monitoring stations for the new sewage Lagoon and its wetland are shown in chapter 4, table 4.1 of the attached O&M manual.

I like to mention that DND, the Federal Agency stationed at Ninissivik, wants to share drinking water from the Hamlet water supply facility in summer 2014 and it is only possible once this licence is renewed as soon as possible.

We trust that this will satisfy the requirements to renew the Water licence for the Municipality of Arctic Bay for the period of ten (10) years from March 31, 2010 to March 31, 2020.

Please contact me if you have any question or concern. I also appreciate if you keep me in the loop of the approval process. Thanks

**Bhabesh Roy, M.A.Sc., P.Eng.**
