I am out office right now but could attend this meeting. 11.00AM EST will be fine. Please send me the conference details.

Bhabesh

**Subject:** Re: 3BM-ARC1419 follow up

Sarah, Bhabesh,

Let's set up a call for tomorrow then, whatever time works for you both.

Sarah said any time after 10am, so we can aim for 11am IQ time?

Thank you,

Good Morning

Nanisivik is using the same Water source and same water truck filling station. But they have their own water truck. They are paying revenue for the amount of water being used in the Camp as any other household. They have a wastes water holding tank and they discharge sewage into the Community lagoon using their own sewage truck.

I really do not know where is the confusion.

I am out of office but will be available for any kind of Tele discussion this afternoon or tomorrow.

Thanks.

Bhabesh

Hello Sergey and Bhabesh,

I think a phone call would be an efficient way of clearing things up. I am available today before 12h00 and tomorrow any time after 10h00.

Regards,

Sarah

Hi Bhabesh and Sarah,

Just wanted to follow up on today's comments received from CIRNA in a mutual email to make sure we are all on the same page.

**Comment #2** (Measuring water quantity) requires **immediate clarification** as to what water use is being referred to in the application with the statement : "*Nanisivik & other municipal activities=39,953 cubic meters*".

From my understanding there is a mutual agreement between the Hamlet and DND, where the Hamlet agrees to supply potable water to and accept waste from the Nanisivik Project.

The newly issued Licence No. 8BC-NNF1920 for the Nanisivik Naval Facility specifies the following water intake options:

*"use of 1200 cubic metres of Water, which may be obtained from Twin Lakes Creek, for industrial (concrete production, compaction, dust control and tank rinsing) purposes", and*

*"11.4 cubic metres per day of water for domestic uses may also be supplied by the Hamlet of Arctic Bay using trucks."*

Bhabesh, does this cover your "*Nanisivik & other municipal activities*" statement or there are any other "*municipal activities*" planned in the future?

Also, since you agreed to 59,900 cubic metres of water intake from Marcil Lake, how would you like the originally requested volumes of *26,922 cubic meters (Public) and 39,953 cubic meters (Nanisivik & other municipal activities)* to be altered? Proportionally? In other words, what do you need the water the most for?

Please, address our comments ASAP, so that we can move forward with the licencing process.

Should you have any questions or wish to set up a conference call, please free to contact me at (867) 360-6338 (extention 29) at your earliest convenience.

Thank you,
