

Therefore, if any of the above land use activities are associated with the road *outside* of established municipal boundaries, that portion of the road must be screened, not to mention IOL permissions granted *if* KivIA lands are crossed; all of which would require screening by NIRB. In fact, Article 12.10.1 of the NLCA states:

No licence or approval that would be required in order to allow a proposed project to proceed shall be issued in respect of a project that is to be screened by NIRB until the screening has been completed and, if a review pursuant to Part 5 of 6 is to be conducted, until after that review has been completed and a NIRB project certificate has been issued by NIRB pursuant to these provisions.

If you have any questions, or would like to forward to us a letter with more detailed maps and project information, please contact us at (867) 983-2593 or 983-2594 (fax). NIRB does thank you for the map at 1:250,000 but it was hard to read and decipher. Thus, if you or the Hamlet have other maps that are more detailed as per issues raised in this letter, please forward them to NIRB or call if that is not possible.

Yours truly,

Stephanie Briscoe
Executive Director
Nunavut Impact Review Board
