Re: Hamlet of Baker Lake Water Licence 3MB-BAK1015 – Water Licence Amendment

Dear Mr. Dwyer,

On behalf of the Hamlet of Baker Lake, we are pleased to submit the following Water Licence Amendment. FSC Architects & Engineers is in the process of completing upgrades to the existing Water Treatment Facility for the Hamlet of Baker Lake. The following Amendment Application form and attached documents detail the planned upgrades and impacts associated with the existing water licence.

A summary of the proposed upgrades and amendment has been attached in both English and Inuktitut.

As the project is currently being issued for tender, with the construction phase to run from July 2011 until substantial completion in the Summer of 2012, we have attached *Issued for Tender* drawings signed and stamped by an engineer registered to practice in Nunavut. *Issued for Construction* drawings will be submitted following Tender Award.

Similarly, a new/revised *Spill Contingency Plan* and *Operation and Maintenance Plan* will be prepared and submitted to the NWB upon commissioning of the facility.

We hope that the attached documents meet your requirements at this time and request that the water licence be amended accordingly. If you require any further information or have questions, please do not hesitate to contact me.

Sincerely,

FSC ARCHITECTS & ENGINEERS
