**Re: Implementation Plan for the Baker Lake Water Licence Application**

Dear Bryan:

As we had discussed on the phone last week, I have taken over this file from Joe Murdoch and will now be the NWB technical advisor assigned to the Hamlet of Baker Lake's water licence application. The NWB would like to follow-up with you regarding the submission of the implementation plan with this letter for the benefit of the parties who were included on the initial NWB letter requesting more information, distributed on June 19, 2006.

During our phone conversation we discussed the implementation plan that was requested by the NWB in Joe Murdoch's June 19, 2006 letter. The letter had requested that an implementation plan be submitted to the NWB by August 19, 2006. In our phone conversation you indicated that the GN has contracted a consultant, Jacques Whitford, to conduct a study and respond to the NWB's request for further information. You indicated that Jacques Whitford would be submitting an implementation plan shortly and that the final report for the study is scheduled to be complete in July/August of 2007. If there are any changes to the proposed schedule since we spoke last week, please let me know.

Should you have any questions, please feel free to contact me at (867) 873-8948, at your earliest convenience.

Regards,
