Hi Dionne:

FYI. We discussed this last week, and we're already assisting the Hamlet to prep an amendment to their water license. Nice pictures though.. :)

Hope all is well in Gjoa this am..see you this afternoon.

Best regards,

Jim

Hi Jim

As you know, I took the week off, but I'll be back to work Monday. I received this message, which was inadvertently routed to my SPAM box for deletion (I'm not sure why my anti-spam filter intercepted it, hopefully not because it came from NTL...), but I caught it on time...Could you please follow up and discuss with Dionne.

Thanks  
Philippe

Hello Philippe,

A quick question for your office.....does the water license concerning the Cambridge Bay Metal Dump site, permit the containment/deposit or disposal of waste oil in 45 gallon drums? How about fuel/oil contaminated earth?

Attached are some photographs of the number and type of drums of waste oil situated at the site. And as Keith Peterson mentioned last month there is a request to deposit about a hundred truck loads of contaminated soil/earth at the same site.

Anyways there is some discussion in our office whether or not these activities are permitted in municipal waste sites in Nunavut through the water licenses...And whether or not the facilities or infrastructure are there for this type of disposal or containment.

Please advise, Sincerely,

**Carson M. Gillis**
