Cape Dorset

Dear Mr. Gilhuly;

Re: Application for a Water Licence

1. The new NWT Waters Act, enacted in June 1993, requires that users of water must have a municipal water licence; at this time the Hamlet of Cape Dorset does not hold such a licence. We suggest that it is important that your Hamlet apply for and be granted such a licence.
2. Provision of a water licence provides for the use of water, and by relationship, disposal of sewage and other municipal waste disposal facilities. We also suggest that provision of a water licence can be of assistance and can provide meaningful and sensitive considerations in the design and development of municipal services in communities of the Nunavut District.
3. Enclosed is a copy of the NWT Waters Act and its Regulations. On page 8 of the Regulations, you will find the application form. Accompanying this application, you must also submit the information that is outlined on page 3 (Section 6(d)) of the Regulations. This section relates to the information that is also required to be submitted when a municipal licence is being applied for.
4. We would encourage you to submit the completed application and the additional required information to the NWT Water Board. Their address is:

NWT Water Board
Box 1500
Yellowknife, NT
X1A 2R3
