December 27, 1995

B9545-S-N5L3-1643  
B9545-S-N5L3-1638Status of Municipal Water Licence Applications: Pond Inlet and Cape Dorset

Ref: Your memo to Dan Elliott dated December 21/95.

1. With reference to para. 3 of your above noted memo, this office has received drawings for the Pond Inlet solid and sewage waste disposal facilities. The first set was sent with the "Design and Operational Concepts Brief - Final Submission" dated December 11, 1992 and forwarded to this office by Water Resources on February 18, 1993. The second set, entitled "Sewage and Solid Waste Relocation - Pond Inlet" is dated May, 1993 and consists of 4 large scale drawings prepared by FSC for GNWT DPW (Project 92-4520).
2. With further reference to para. 3, you state that drawings for the Cape Dorset waste have been received but that the water supply drawings have yet to be submitted. Two comments. First, please provide a copy of the waste disposal plans to this office as no copy has yet been provided to us. Second, a design brief for the new water supply system for Cape Dorset was received by the NWT Water Board on September 15, 1992. This office received a copy of this report (via Water Resources) on September 29, 1992. This report had been prepared by Oliver, Mangione, McCalla & Assoc. Ltd. in May 1991 for MACA.
3. If you require copies of any of these documents, this office will provide such services.
