ATTN: Sid Bruinsma – Enforcement / Emergencies Officer

Dear Sid

Re: Status of Proposals re Cape Dorset Sewage Treatment

In November of 2004 the Government of Nunavut requested Proposals for the planning, approvals and detailed design for the new sewage treatment system in Cape Dorset. On December 15, 2004 a project team consisting of representatives from the Department of Community Government and Services and the Hamlet of Cape Dorset met to evaluate the submissions. It was determined that some clarification is required from all three proponents in order to fairly evaluate each submission. Following this process the successful proposal will be chosen early in the New Year. This extra step will have very little impact on the planned project completion date.

We will continue to update your office regarding the progress of this project. Please feel free to contact me if you have questions or concerns.

Yours Sincerely,

Art Stewart
Senior Administrative Officer
