**Subject: Cape Dorset Sewage Lagoon Water Licence Amendment – Engineering Consultants to the NWB**

Dear Mr. Stewart:

The Nunavut Water Board (NWB) has obtained external engineering consultation services that will provide technical advice to the NWB on the **NWB3CAP0207** amendment application. Consultants have been retained to evaluate design and construction practices where there is a potential of waste to enter freshwater. Holger Hartmaier of Bruce Geotechnical Engineering Inc. (BGC) has been retained to provide a geotechnical review of the Cape Dorset amendment application. John Grainger of Associated Engineering Ltd (AE) has been retained to provide a technical review focusing on the treatment efficiency function of the proposed design.

Should you have any questions regarding the above, please feel free to contact me at (867) 360-6338.

Sincerely,

*Original signed by:*
