Subject: Cape Dorset Sewage Lagoon Water Licence Amendment – Intervener Response Follow Up

Dear Mr. Strong:

The NWB has received Intervener comments on the DCL response received June 5th, 2006. These responses have been enclosed with this letter document for your information. The NWB, after reviewing the Intervener responses, requests detailed discussion on the options available for the deposit of sewage. This includes, but is not limited to, the treatment technologies that could be installed, financial considerations for each treatment technology, anticipated treatment efficiencies and expected treatment ranges for each option, the containment capabilities of the presented treatment options, operation and maintenance for each option and any other function that DCL believes treatment option may influence the act of depositing waste into freshwaters.

The NWB may decide to hold a technical meeting where the application and formulated DCL responses would be presented. This is dependent on the forthcoming DCL responses to be received by the NWB.

Should you have any questions regarding the above, please feel free to contact the undersigned at tech1@nwb.nunavut.ca.

Sincerely,

Original signed by:

Joe Murdock
Coordinator of Technical Services
