Art Stewart
Senior Administrative Officer
Hamlet of Cape Dorset

**Subject: Cape Dorset Sewage Lagoon Water Licence Amendment – Technical Meeting
September 19th, 2006**

Dear Mr. Stewart:

The Nunavut Water Board (NWB) would like to thank the Hamlet of Cape Dorset for accommodating the NWB and other technical meeting participants this past September 19th, 2006. Through the technical meeting exercise it is understood that significant new application material has been brought forward to the NWB. This information is not consistent with the information presented in the application the NWB currently has on file. This new information must be communicated to the NWB so it may undergo a proper intervention through the 30-day public review period. **The NWB requests a stand alone final engineered design report that communicates all the particulars discussed in the technical meeting as well as all information submitted earlier that will compliment the new final engineered design. This stand alone document is to not reference earlier application materials and shall communicate all formulations of the final engineered design in a logical methodic manner.** An Intervener should be able to understand the entire final engineered design through this stand alone document to be submitted. After this has been completed this single document will be gazetted for regulatory and public comment in accordance with the Nunavut Waters and Nunavut Surface Rights Tribunal Act.

Should you have any questions regarding the above, please feel free to contact me at (867) 360-6338 or tech1@nwb.nunavut.ca

Sincerely,

Original signed by:

Joe Murdock
Director of Technical Services
