Subject: Sampling Programs at Arviat & Baker Lake/Licence Applications
from Pond Inlet & Cape Dorset

This is in response to your memo of April 30, 1995 and Paul Smith's memo of May 24, 1995 regarding the subject matter.

Arviat & Baker Lake

All sample results have been received for both programs and are currently being compiled by our summer student, Michel Haener. Draft reports on each program should be available within a month.

Pond Inlet & Cape Dorset

We have been waiting for drawings of the facilities in each of these communities before proceeding with licencing. Some drawings have been received and, at this point, I suspect that we probably won't get any more. I will, therefore, begin the process with the information we have available rather than delay them any further. You should expect to see some progress within the next few weeks.

Thanks for your attention to these matters. I'm sorry for the delays.

Brian Collins
