Mrs. Becker,

I'm sending the NWMB comments/concerns regarding the Municipality of Cape Dorset application for water use and waste disposal for municipal purposes. I'm concerned about raw sewage infiltrating fish migration route and discharge from the sewage lagoon that is contaminating the fishing area in the bay, so residents have to stop harvesting clams, sculpin and cod. The Municipality has outlined these and other concerns and it appears that these situations will be taken care of; this should be a condition of the license.

As long as the Municipality of Cape Dorset takes steps to address these situations during the term of the license, we have no other concerns other than those identified by the Municipality.

Best regards

Josée Galipeau
